# Proposal 1: Thabo's Auto Electrical

## 1. Organisation Overview

**Name:** Thabo's Auto Electrical

**History:** A small, locally owned workshop in Phuthaditjhaba that diagnoses and repairs electrical faults in cars, bakkies, and light commercial vehicles, with a loyal customer base built through word of mouth and honest workmanship.

**Mission:** To provide reliable, skilled, and honest auto-electrical diagnostics and repairs to the local community.

**Vision:** To become the most trusted auto-electrical repair workshop in the eastern Free State.

**Target Audience:** Local car owners, taxi operators, and small businesses running delivery or fleet vehicles.

## 2. Website Goals and Objectives

### Goals:

- Give the business its first online presence for local searches (e.g. "auto electrician near me").
- Generate leads through an online enquiry/booking form.
- Build trust through photos of past work and clear service information.

### Key Performance Indicators (KPIs):

- At least 15 enquiry/booking submissions per month within three months of launch.
- Improved local Google search ranking within six months.

## 3. Current Website Analysis

Thabo's Auto Electrical has no website; it relies on its shop signboard, word of mouth, and returning customers.

### Weaknesses identified:

- Invisible to customers searching online for auto-electrical services.
- No way to see services, hours, or location before visiting.

### Proposed improvements:

- Launch a mobile-friendly website listing services, hours, and contact details.
- Add an always-available booking/enquiry form.

## 4. Proposed Website Features and Functionality

- Homepage: hero image, intro, "Book a Diagnostic" call-to-action.
- About Us, Services (diagnostics, wiring, batteries, accessories), Enquiry form, and Contact page with map.

## 5. Design and User Experience

**Colour Scheme:** Charcoal black (#1E1E1E) with an electric blue accent (#0074D9) — a technical, automotive feel.

**Typography:** Roboto (sans-serif) throughout, for a clean, modern, readable look on mobile.

**Layout and Design:** Mobile-first single-column layout with a sticky navigation bar.

**User experience considerations:**

- High-contrast "Book Now" call-to-action on every page.
- Click-to-call/WhatsApp contact visible from any page.

*Figure A below shows a wireframe of the proposed homepage layout, illustrating the placement of the header, navigation, hero section, content blocks, and footer.*

## 6. Technical Requirements

**Hosting:** Shared hosting via a South African provider (e.g. Afrihost or Host Africa) to keep costs low and ensure fast local load times.

**Domain Name:** www.thabosautoelectrical.co.za

**Languages/Frameworks:** HTML5 for Part 1 (structure and basic content); CSS3 to be introduced in Part 2 for styling and responsive design; JavaScript to be introduced in Part 3 for interactive features such as form validation.

## 7. Timeline and Milestones

| Week      | Milestone                                                  |
|-----------|------------------------------------------------------------|
| Weeks 1-2 | Approval, research, sitemap, wireframes, folder structure. |
| Weeks 3-4 | Build HTML pages, navigation, comments, testing.           |
| Weeks 5-6 | GitHub setup, README, final review and submission.         |

## 8. Budget

| Item                 | Estimated Cost (ZAR) |
|----------------------|----------------------|
| Domain (1 year)      | R150                 |
| Hosting (1 year)     | R900                 |
| Total estimated cost | R1 050               |

# Proposal 2: Phuthaditjhaba Community Food Garden

## 1. Organisation Overview

**Name:** Phuthaditjhaba Community Food Garden

**History:** A community-run non-profit that grows vegetables and distributes food to vulnerable households, while training volunteers in basic gardening and life skills.

**Mission:** To grow and distribute fresh food to vulnerable households while empowering volunteers through practical training.

**Vision:** A community where no household goes without fresh food, sustained by an empowered volunteer base.

**Target Audience:** Vulnerable households receiving support, community volunteers, and potential donors or sponsors.

## 2. Website Goals and Objectives

### Goals:

- Reach a wider pool of donors and volunteers than a Facebook page alone can achieve.
- Create a central place to explain the organisation's mission and show its impact.
- Provide a simple way for visitors to get involved or donate.

### Key Performance Indicators (KPIs):

- At least 10 new volunteer sign-ups or enquiries per month via the website.
- At least 5 donor/sponsor enquiries submitted per month.

## 3. Current Website Analysis

The organisation has no website; it shares updates informally through word of mouth and a Facebook page.

### Weaknesses identified:

- No central, professional place to explain its mission or show its impact.
- No formal way for visitors to donate or get involved online.

### Proposed improvements:

- Launch a website that tells the organisation's story and shows its impact.
- Add a clear "Get Involved" enquiry page for volunteers and donors.

#### 4. Proposed Website Features and Functionality

- Homepage: hero image, mission statement, "Get Involved" call-to-action.
- About Us, Programmes (garden, food parcels, skills training), Enquiry form, Contact page with map.

#### 5. Design and User Experience

**Colour Scheme:** Earthy green (#4C7A3D) with a sunflower-gold accent (#E8A33D) on a cream background.

**Typography:** Merriweather (serif) for headings; Open Sans (sans-serif) for readable body text.

**Layout and Design:** Mobile-first, photo-led layout that lets the organisation's impact speak visually.

**User experience considerations:**

- A clear "Get Involved" call-to-action on every page.
- A short, simple volunteer/donor enquiry form.

*Figure B below shows a wireframe of the proposed homepage layout, highlighting the hero section, storytelling content blocks, and footer.*

Fig B Community Food Garden - Homepage Wireframe

## 6. Technical Requirements

**Hosting:** Free or low-cost non-profit-friendly hosting where available (e.g. Afrihost entry-level shared hosting), to keep ongoing costs minimal for the organisation.

**Domain Name:** [www.phuthaditjhabafoodgarden.org.za](http://www.phuthaditjhabafoodgarden.org.za)

**Languages/Frameworks:** HTML5 for Part 1 (structure and basic content); CSS3 to be introduced in Part 2 for styling and responsive design; JavaScript to be introduced in Part 3 for features such as an image gallery.

## 7. Timeline and Milestones

| Week      | Milestone                                                  |
|-----------|------------------------------------------------------------|
| Weeks 1-2 | Approval, research, sitemap, wireframes, folder structure. |
| Weeks 3-4 | Build HTML pages, navigation, comments, testing.           |
| Weeks 5-6 | GitHub setup, README, final review and submission.         |

## 8. Budget

| Item            | Estimated Cost (ZAR) |
|-----------------|----------------------|
| Domain (1 year) | R150                 |

| Item                 | Estimated Cost (ZAR) |
|----------------------|----------------------|
| Hosting (1 year)     | R900                 |
| Total estimated cost | R1 050               |
